

SMART CUT QUOTE

SMART CUT QUOTE

Estimating software designed specifically for laser and profile-cutting businesses. Automating the quotation and estimate generation process for laser cutting projects reduces time and improves pricing accuracy.

MATERIAL AND SHEET MANAGEMENT:

For laser cutting, plasma cutting, waterjet cutting, and other cutting methods, Smart Cut Quotes include material consumption calculations. Welding, bending, painting, and subcontracting operations can also be included in the quotation.

2D CAD IMPORT

Smart Cut Quote supports two popular 2D formats, DXF and DWG. You can import, view, and correct 2D CAD files. Even the most problematic drawings can be corrected. A drawing with multiple parts is separated, and unnecessary entities can be removed.

MULTIPLE-MACHINE CUTTING TECHNOLOGY

With Smart Cut Quote, you can easily manage rates, speeds, and overall processes by adding all your cutting machines. You can nest parts to get the exact number of sheets you need for your parts. Smart Cut Quote uses a powerful reporting engine to produce professional reports. Create, download, and email a PDF quotation using the software.

Features & Benefits

- Management of materials and sheets
- Management of clients
- Update the Sheet cost instantly
- The latest version of DXF and DWG imports
- Costs associated with common operations may be included
- Reports that are professional and customisable

Name	Preview	Quantity	Multi-Quantity	Grain	Machine	Material	Operations	Price Marking	Unit Cost	Total Cost
